

Industrial Flood Protection

Sowerby Bridge Business Park, Calderdale

Products: Lakeside Demountable Flood Barriers; Ancillary Sewage Defence & Brick Defence Measures

Completion Date: Sept 2017

The industrial units in Sowerby Bridge Business Park suffered devastating damage, with significant commercial impact, during the 2015 Calderdale floods.

Clients:

Various, all units in Sowerby Bridge Business Park

Lakeside installed their flood defence products to all units in the park:

- **Opening defence:** Flood Barriers to various individual and roller shutter openings; Flood Barrier accessories including lockable clamps
- **Sewage defence:** Non-Return Valves to existing sewage outlets; Non-Return Valves to new inspection hatches; bespoke Sealed Manhole Covers; WC Pan Seals
- **Brick defence:** Anti-flood Air Bricks

Lakeside were selected to install the defences directly by the park owner, notably as a result of the Lakeside Demountable Flood Barrier System and its market-leading features, as well as Lakeside's unique offering of being the only manufacturer of a flood barrier system to also manage installation in house.

Bespoke features:

- Large scale installation, including 34no. Flood Barriers.
- Lockable top pressing clamps for Flood Barriers.
- Dye test to drains, to determine required sewage defence measures.
- Bespoke sealed manhole cover.
