

WATERFILLED DAM BARRIER

Fast, strong and stable re-usable water-filled dam barrier

KEY FEATURES

- **Designed for extreme weather** and stability
- **Withstands dynamic and static environments** i.e. withstands waves as well as static water
- **Extremely stable** – unlike other systems, no sandbags and sealant under front end to withstand waves required
- **High-specification materials**, e.g. high-tech, rot-proof sowing tread (most important component in the dam), unrivalled by competitor systems
- **Rapid deployment speed** – just roll out
- **No pumps required to fill system**, relies solely on rising water
- **2 Year Manufacturer's Warranty**

SPECIFICATION:

- **Material:** Tarpaulin
- **Heights available:** 40cm, 60cm, 80cm H. Heights up to 150cm available upon request
- **Widths available:** 10.2m as standard. 6m or 15m also available
- **Tested at official wave test facility** (7 days of testing)
- **Product Versions:**
 - Stable – designed for still water and waves 10-15cm
 - Premium - designed for still water and waves 10-15cm, with extra-large floats along top edge
 - Extreme Weather – designed for waves up to 35cm
